

NOVA View™*

Automated IFA microscope

Confidence

Welcome to the new world of fully automated testing

NOVA View provides a platform designed to standardize the interpretation of IFA slides. This fully automated system has the potential to increase productivity while providing more consistent results. Step confidently into the future of automated IFA testing with NOVA View.

- Reduces hands-on time
- Supports standardization
- Prompts appropriate analysis
- Facilitates case review

NOVA View™*

Automated IFA microscope

A fully automated IFA microscope—combined with an intelligent digital imaging system—that reads, interprets, and archives images of IFA-stained HEp-2 slides*

Reduces hands-on time

- Automated focus, interpretation, and recording of IFA HEp-2 slides help increase productivity by reducing time expended on manual operations

Supports standardization

- Onboard digital imaging helps standardize interpretation of IFA-stained HEp-2 slides
- May help maximize the accuracy of classification
- Delivers more objective results

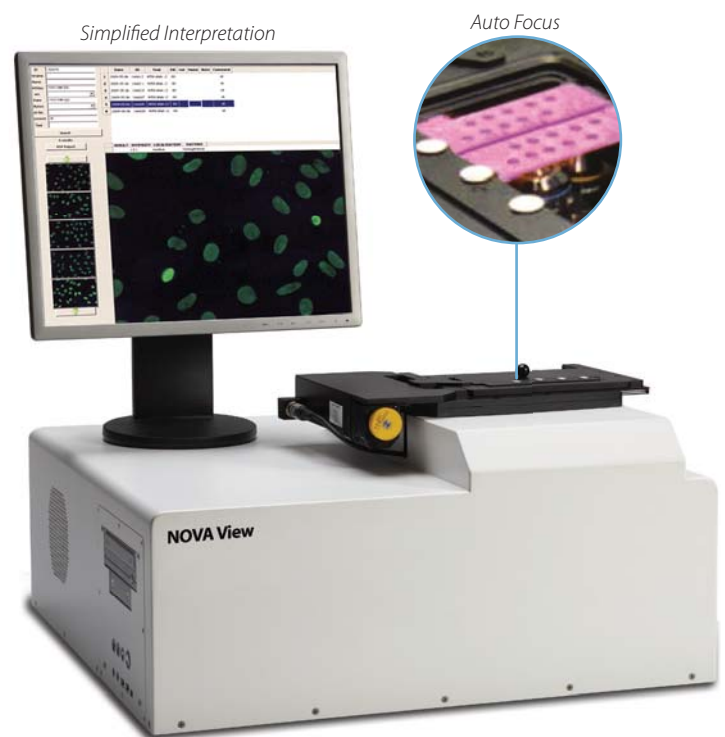

Prompts appropriate analysis

- Completes an initial review and analysis of all samples in each run
- Classifies samples and identifies wells of interest for further study
- Helps staff focus time and effort on slides requiring closer scrutiny

Facilitates case review

- Creates high-quality digital images and stores them in an onboard database
 - For electronic medical record
 - For patient result report
 - For current or future case review

Step confidently into the future of IFA testing with the fully automated power of NOVA View
