

QUANTA Link™

Centralized intelligent network

Control

Workflow management made easy

QUANTA Link is a powerful, easy-to-use workflow management system that gives you immediate control of all your autoimmune IFA, EIA, and chemiluminescence sample processing.

- Seamlessly integrates instruments with your laboratory information system (LIS)
- Efficiently controls instrument workflow
- Effectively manages test orders and results
- Optimizes quality control through trending and analysis

Workflow management made easy

Seamlessly integrates instruments with your LIS

- Manages autoimmune instrumentation, whether from INOVA or others
- Integrates with LIS systems
- Provides real-time status of all your samples

Efficiently controls workflow for IFA, EIA, and chemiluminescence testing

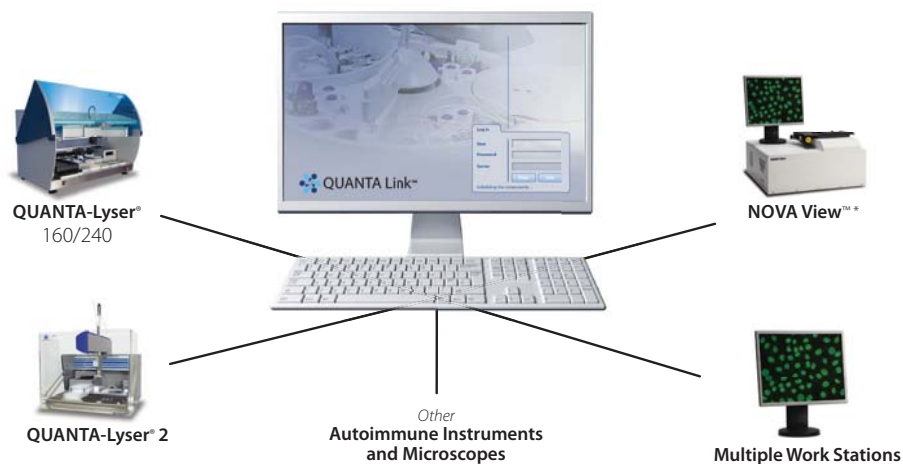

- Streamlines worklists and results to save you time
- Effectively centralize all QC results and trends
- Facilitates the creation and configuration of testing algorithms

Effectively processes orders and results

- Manages and configures slides, dilutions, and much more
- Creates worklists and sends them to the instruments
- Lets you review, edit, and validate test results using your own criteria
- Creates customizable reports

Optimizes quality control

- Posts QC information from all linked instruments
- Provides trending over time
- Helps you spot areas requiring intervention
- Eliminates IFA transcription errors
